

Frida Kahlo (1907-1954)

Frida Kahlo was a Mexican artist. She lived in Coyoacán, which is in Mexico. She loved her country and liked to paint Mexican plants, animals and objects.

When she was young, Frida had an accident that made her very poorly, but she liked painting so much that she kept doing it while in bed and in her wheelchair.

Frida liked to paint herself. To express what she liked and what she was feeling, she painted plants and animals around her.

Watercolour paint
